1)Write a python program to test a given number is prime or not:

```python
n=int(input("enter the num:"))
for i in range(2,n):
    if (n%i==0):
        print("no prime")
        break
    else:
        print("prime")
        break
```
